DETAILED ACTION

Election/Restrictions

1. Applicant's election, filed 6/14/2004, has been received. Claims 1-3 have been withdrawn.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I.A. Claims 4-12, drawn to a device to track tax data

I.B. Claims 13-27, drawn to a data structure

The inventions are distinct, each from the other because of the following reasons:

Inventions I.A and I.B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I.A has separate utility such as the device could be used to read any data (note that all references to tax data are recited in intended use or capable language). See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Frank Abramonte on 9/3/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3627

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
